material and then removing the insulating material, it fails to show or make obvious forming a fin by placing strained material in a trench of compound semiconductor material and then removing the compound semiconductor including all the limitations of the independent claims.

While the Applicants agree that the allowed claims recite a combination of subject matter that is patentable over the cited references, the Applicants do not necessarily agree with or acquiesce in the statement of reasons for allowance given by the Examiner. Moreover, the Applicants note that the recited subject matter as well as various other subject matter and/or combinations of subject matter may be patentable for other reasons than those given by the Examiner. The Applicants expressly reserve the right to set forth additional and/or alternative reasons for patentability and/or allowance in connection with the present Application or in any other future proceeding.
